

RTS No. 5 Salt Away Efflorescence Remover

PRODUCT DESCRIPTION

RTS No. 5 is used to treat efflorescence on masonry. Efflorescence occurs naturally in masonry, also from free lime carbonisation as it comes to the surface. It appears as white deposits on brickwork, mortar, patios and driveways.

RTS No. 5 is an effective non-acid treatment that removes calcium carbonate, sulphates and chlorides and sodium chloride.

ADVANTAGES

Unlike other products, RTS No. 5 not only removes the surface salt, it penetrates deep into the surface. The active components complex with any salts in the substrate rendering them soluble in water, thus removing the reappearance of white deposits.

TECHNICAL DATA

Colour	Light Purple	Shelf Life
Odour	Virtually Odourless	24 months from the date of manufacture in the original unopened container
PH	4.5	
Application Temperatures	Minimum +5°C Maximum 30°C	

APPLICATION

- Always test on a small hidden portion of the surface to be cleaned to check compatibility and performance before commencing with the whole area.
